Collibra

FACTSHEET

Resident Enterprise Architect Program

Dedicated expertise for every Collibra domain. Turn your data and AI investments into measurable business outcomes, faster.

> Our Resident Enterprise Architect's knowledge, teamwork and communication has been phenomenal.
>
> Collibra retail customer

Collibra Platform offers limitless capabilities to harness the power of your data and AI. With the Collibra's Resident Enterprise Architect (REA) program, you get a dedicated expert who understands your environment and objectives, delivers strategic and architectural guidance, and accelerates the outcomes that matter most to your business – across data governance, data quality, AI governance, and unstructured data.

One REA. Every outcome you need.

There's no need to piece together separate engagements for separate needs. Every Resident Enterprise Architect brings end-to-end expertise to all of Collibra to deliver outcomes across every domain you're scaling:

Data governance
Build the policies, stewardship, and accountability that make trusted data usable at scale.

AI governance
Stand up the oversight and controls that let you scale AI initiatives with confidence.

Data quality
Design the deployment patterns and architecture that catch issues before they become business risk.

Unstructured data
Extend the same rigor and context to documents and files that fuel your AI and analytics programs.

Outcomes you can expect

- **Faster time-to-value:** A technical solution and implementation plan aligned to your roadmap and specific use case(s)
- **Stronger governance maturity:** Strategic, configuration, and performance best practices instilled across your organization
- **Reduced operational risk:** Proactive assessments and recommendations that keep org health and performance on track
- **Accelerated team capability:** Enablement tailored to your team, building skills, knowledge, and certifications faster
- **Higher adoption, less friction:** Proven techniques to increase adoption, accelerate use cases, and stay ready for upcoming releases

Drive business value

Quickly expand use cases across governance, quality, and AI with strategic technical design and thought leadership.

Build skills and knowledge

Accelerate team expertise and adoption through tailored guidance, enablement, and best practices.

Innovate with confidence

Scale, optimize, and maximize your platform capabilities — securely and reliably — across every data and AI use case.
