Accelerate your data journey

From data leaders to data stewards to data consumers, the Collibra Education Services team has trained thousands of people over the years. We are laser-focused on helping you and your colleagues develop the role-specific skills needed to accelerate your Collibra implementation and adoption.

Wherever you are in your data journey, Collibra Education can equip your team with the knowledge they need to gain data confidence.

Considerations for education planning

- **All learners are unique:** You need to meet them where they are and provide multiple styles of learning to make sure the knowledge resonates and sticks

- **Focus on roles:** There are very few aspects of Collibra that are generic to users. They'll care about specific things relevant to their needs that help them do their job easier and better. Don't try a one-size-fits-all approach

- **Make it practical:** Practice makes perfect, as they say. Make sure your learning plans incorporate hands-on exercises, real-life scenarios and training for skills that will be used within your environment

- **Plan roll-outs strategically with education in mind:** Like all technology, Collibra's platform is constantly evolving with new capabilities. Before just accepting and rolling out new use cases within your platform, consider how it will impact your users and plan education with a change management focus

- **Build for the long-term:** Don't just think about what your users need to know today, but where you want them to be in a year or two from now

Collibra Education Services: Learning options

Blending your education plan with a combination of self-paced learning, live sessions and hands-on practice has shown to be the most effective way to meet your learners' needs.

Collibra University: Self-paced and free. It is the perfect resource for broad audiences to learn product capabilities and ways to expand use cases.

Instructor-led training: Live interactive sessions, hands-on exercises, public and private training. This resource is paid via Education Credits and is great for those who need to work within the platform.

Premium Education: Practice your skills with hands-on exercises provided in our Virtual Lab training environment, attend unlimited public training and get certified. This resource is paid via yearly subscription for designated learners and is an ideal option for those who strive to be Collibra experts.

Custom training: Video or instructor-led training (with or without exercises). This option is paid via Education Credits and is perfect for showcasing your specific use cases and helping with user adoption.

Certifications: Includes exams, certificate and digital badge to showcase learning achievements — a great way for product champions to show off their accomplishments.

Collibra University

Your journey to data confidence starts here

Where will you find hundreds of courses to help your team gain data confidence? Covering everything from data governance and privacy to data catalog and lineage, Collibra University is our free, online catalog of courses where you'll find a wide range of highly specific courses organized by role, product and capabilities.

Sample learning paths

900+ certified workflow developers

1K certified solution architects

1.9K avg weekly course completions

300+ certified Collibra Rangers

Instructor-led training (ILT)

Make learning practical and personal

Instructor-led training offers a comprehensive and engaging way to learn and practice new Collibra skills in a group setting for up to 15 participants. These sessions include interactive lessons, demonstrations, polls and practice. Our dedicated team of instructors will ensure that participants complete their work correctly and allow screen-sharing to troubleshoot any learner issues.

With the option to choose between private and public formats, virtual or onsite, ILT ensures flexibility and accessibility. Additional benefits include:

- 60-day access to class recordings

- 2-week sandbox for hands-on practice

- A copy of the presentation

ILT isn't for everyone. But if you want interactive and engaging learning experiences, collaboration among participants and guidance from expert instructors who share best practices and offer personalized feedback, then ILT is for your team.

View the course syllabi [here](#).

ILT | Session types

Private

Audience: cohorts of learners on the same learning journey.

Public

Audience: individuals who want to learn specific skills at their own pace and learn from other organizations.

Custom

Audience: cohorts who need sessions tailored to your organization's goals and your own environment.

How do I sign up for private training?

Customers with Education Credits can have their Training Organizer coordinate training using the Education dashboard. Customers can select the time for training that works best for their teams.

How do I sign-up for public training?

Every quarter, we offer a global schedule of our most popular training courses.

- Premium Education members: View and enroll for sessions through Collibra University

- Customers with Education Credits: Training Organizers can sign users up via the Education dashboard

Custom training — you've got options

Our custom training offerings allow you to provide training that directly speaks to your organizational goals by providing contextual learning focused on specific use cases of teams or roles. Working side by side with your team, we will design training to ensure learners gain comfort and confidence in using Collibra effectively and efficiently.

We offer two learning formats for custom training that can be hosted in your environment or our training sandbox.

Instructor-led demonstration videos

Includes an outline, customized script and a recorded video demonstration.

> Popular videos: Introduction to Collibra, Navigation and Searching, Asset Exploration and Workflows. Watch this example video.

Instructor-led training course

Includes a course outline, presentation, live demonstrations and the option for hands-on exercises.

> Popular sessions: Data Steward and Data Owner workshops

How do I get started with custom training

Customers with Education Credits can have their Training Organizer schedule a complimentary scoping session. We offer both custom ILT courses and custom videos as learning options. An education team member will meet with you to discuss and outline the best method to achieve your learning goals.

Collibra certifications

Collibra certifications offer the opportunity to earn an industry-recognized certificate and digital badge to share your achievement with your professional network.

What do we offer?

We provide role-based certification paths that include hands-on exercises and an exam designed to validate your competency and expertise.

How do I get started?

Experience with Collibra is a prerequisite. We recommend following our premium certification paths, which include ILT or Virtual Labs:

- Enroll in the certification path

- Take the courses and pass the exam

- Share your digital badge with your professional network to showcase your achievement

Achieving certification equips you with the skills and recognition to advance both your career and your organization's data initiatives. Learn more.

Choose your certification path

	DATA STEWARD	DATA QUALITY STEWARD	WORKFLOW DEVELOPER	INTEGRATION ENGINEER	SOLUTION ARCHITECT
Public ILT Per person	7 Education Credits or included with premium	4 Education Credits or included with premium	9 Education Credits or included with premium	13 Education Credits or included with premium	21 Education Credits or included with premium
Virtual Lab Per person	Included with premium	Included with premium	Included with premium	Included with premium	Included with premium
Private ILT Group of up to 15	14 Education Credits	8 Education Credits	22 Education Credits	36 Education Credits	54 Education Credits

Those with verified proper experience can forego the prerequisite and be enrolled directly in the exam.

- Once the above are complete, log in to Collibra University and apply here, apply here

Pricing and planning

Pricing and planning

Our paid education offerings are accessible via Education Credits or a Premium Education subscription.

Education Credits

Education Credits can be used in exchange for instructor-led and custom training:

- You can purchase individually or in bundles for convenience and savings
- They are redeemable for up to 12 months after purchase, unless otherwise specified. Multi-year purchase options are available to enable multiple cohorts over time

Private training

1 credit = 1 hour of private training for a group of up to 15

*On-site training costs will also include the instructor's Travel and Expenses

Public training

1 credit per person per session

View the schedule here

Custom training

Calculated based on course duration, the inclusion of exercises, and the number of sessions required.

Meet with the Collibra Education team to determine credit requirements.

Premium Education subscription

Collibra Premium Education is a 12-month education subscription that offers exclusive access to learners who want to learn, practice, and prove their Collibra expertise.

What's included:

- Virtual Labs
- Unlimited registration for public instructor-led training
- Certification paths with digital badging
- 2 free certification exam attempts, per exam type

Build a training plan: Chart your steps to success

1

Identify personas and responsibilities

Begin by identifying the key personas within your organization, such as Owners, Stewards, Engineers, Analysts and others, and outline their specific responsibilities.

2

Create a training plan

Develop a tailored training plan for each persona:

- What knowledge do they need to perform their roles effectively?

- Which learning format is best suited for each concept?

- What courses are necessary to meet their training needs?

3

Determine required education products

Determine how many Premium Education members are required. Estimate the number of Education Credits needed to implement this plan over one, two or three years.

4

Purchase Education products

Procure the credits or subscriptions required to execute your training plan through single-year or multi-year purchase options.

5

Schedule training

Use the Education dashboard to schedule the required training sessions and get your team started on their learning journey.

The way forward to data confidence

With Collibra Education Services, you're not just learning a platform—you're gaining the knowledge and skills to unlock the full potential of your data, drive meaningful outcomes and lead your organization toward a smarter, data-driven future.

Whether you're just getting started, looking to deepen your skills, or aiming to achieve advanced certifications, our education and training programs are designed to meet your needs at every stage.
