Collibra

Ignite™

FACTSHEET

# Ignite implementation services

## For Collibra Platform

Launch your first Collibra use case and go live in three months or less. Plus, build the skills to run and grow the platform yourself. Ignite gives you expert-led configuration, role-based training and a dedicated Enterprise Architect through your first year. The result: Your teams adopt Collibra and keep seeing value long after go-live.

### Why Ignite

- **Go live fast:** Launch your first use case within three months
- **Build in-house expertise:** Training matched to each person's role, so your team can configure and manage the platform on its own
- **Drive adoption:** Adoption and change plans tailored to your needs
- **Sustain momentum:** Dedicated Collibra experts through year one to help you add use cases and innovate

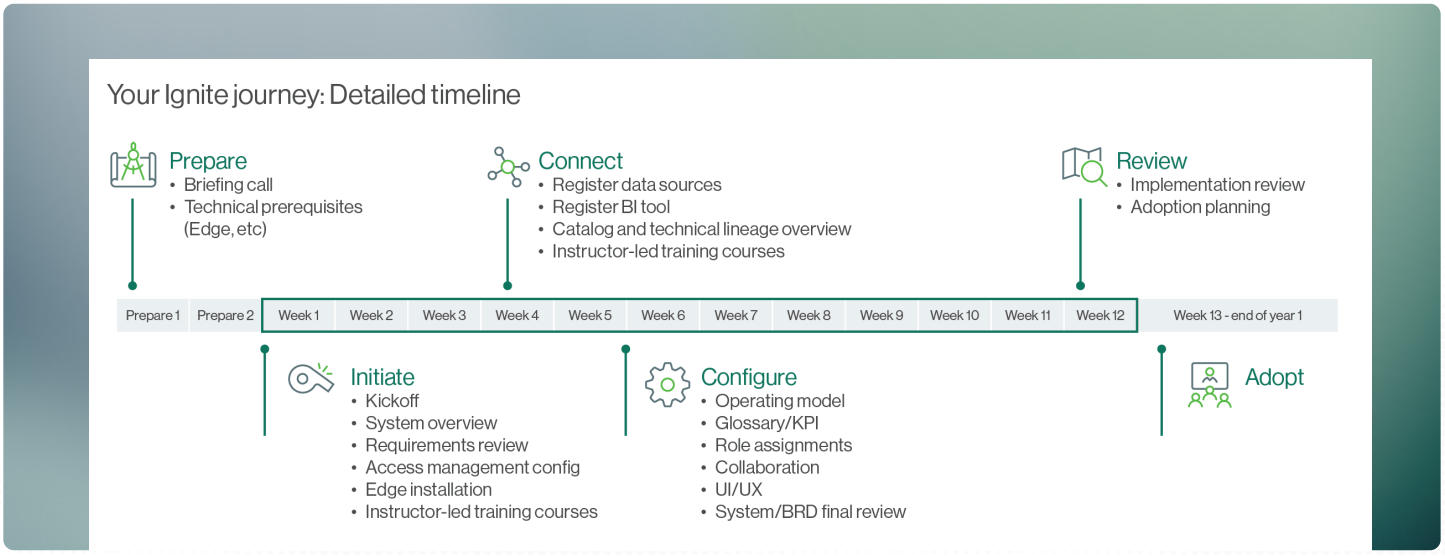

### Your Ignite journey

Implementation phases

The Ignite implementation consists of six distinct phases:

- **Prepare:** Get aligned and ready. Hold a briefing call and complete technical prerequisites so kickoff runs smoothly
- **Initiate:** Launch with confidence. Confirm business requirements, configure access management and install Edge
- **Connect:** Bring your data into one catalog. Connect your data sources and BI tools, with an overview of lineage integrations
- **Configure:** Make Collibra fit your organization. Learn to set up the platform to support your policies and business needs
- **Review:** Go live and plan what's next. Review your environment and start mapping future use cases
- **Adopt:** Keep advancing. Work with an Enterprise Architect, at the frequency you choose, to grow your solution after launch

From the first call through go-live, your Collibra team supports you with calls, pre-work tasks, workshops and education.

# The details

## People

- Collibra team: Solution Architect, Technical Architect, Implementation Manager and Services Manager. A named team guides you from kickoff to go-live
- Your team: Platform Administrator / Architect, Data Governance lead, Data Steward, Data Engineer and Project Manager. Each role is involved where it matters, so knowledge stays in-house

## Connections and setup

- Three metadata integrations from these supported drivers. Your key data sources are cataloged and searchable at launch
- One BI tool technical lineage harvester from any supported BI connector. See how data flows from source to report.
- Collibra Edge component. Connects Collibra securely to your data sources
- SSO through a supported method and/or SCIM. Users sign in with your existing credentials, and access stays aligned with your identity provider

## Education

- During implementation: 12 hours of instructor-led training tied to your implementation activities, so your team learns by doing
- Post-implementation: Two Premium Education subscriptions to keep building skills and drive solution value. Each includes: Unlimited public instructor-led training, exclusive workshops, hands-on practice and two attempts at every Collibra certification exam. See what's included
- Access to Collibra University: Self-paced, role-based learning your team can use anytime

## Post-implementation support

After implementation is complete, you keep working with an Enterprise Architect to execute your adoption plan and adapt Collibra as your needs change. Here are a few example scenarios:

- Accelerate adoption with a clear roadmap: Co-create a yearlong plan using methods from real-world examples, so your teams see value sooner and adoption sticks
- Reduce risk and avoid rework: Proactive reviews and recommendations catch issues early, and expert support moves your configuration to production with confidence
- Scale with confidence: Evolve your technical design as needs change and launch new use cases with hands-on help, without starting from scratch
- Build lasting self-sufficiency: Coaching and best practices help your team operate independently, while early access to new Collibra functionality keeps you ahead of the curve

Ignite combines implementation, hands-on education and a year of adoption support to get you to value quickly and keep it growing. Talk to your Collibra team for details.

Ready to accelerate your journey to data intelligence? Collibra is ready to help bring your vision to life. Talk with your Collibra Account Executive for details.
